

2025 Seasonal LAI across Plant Types

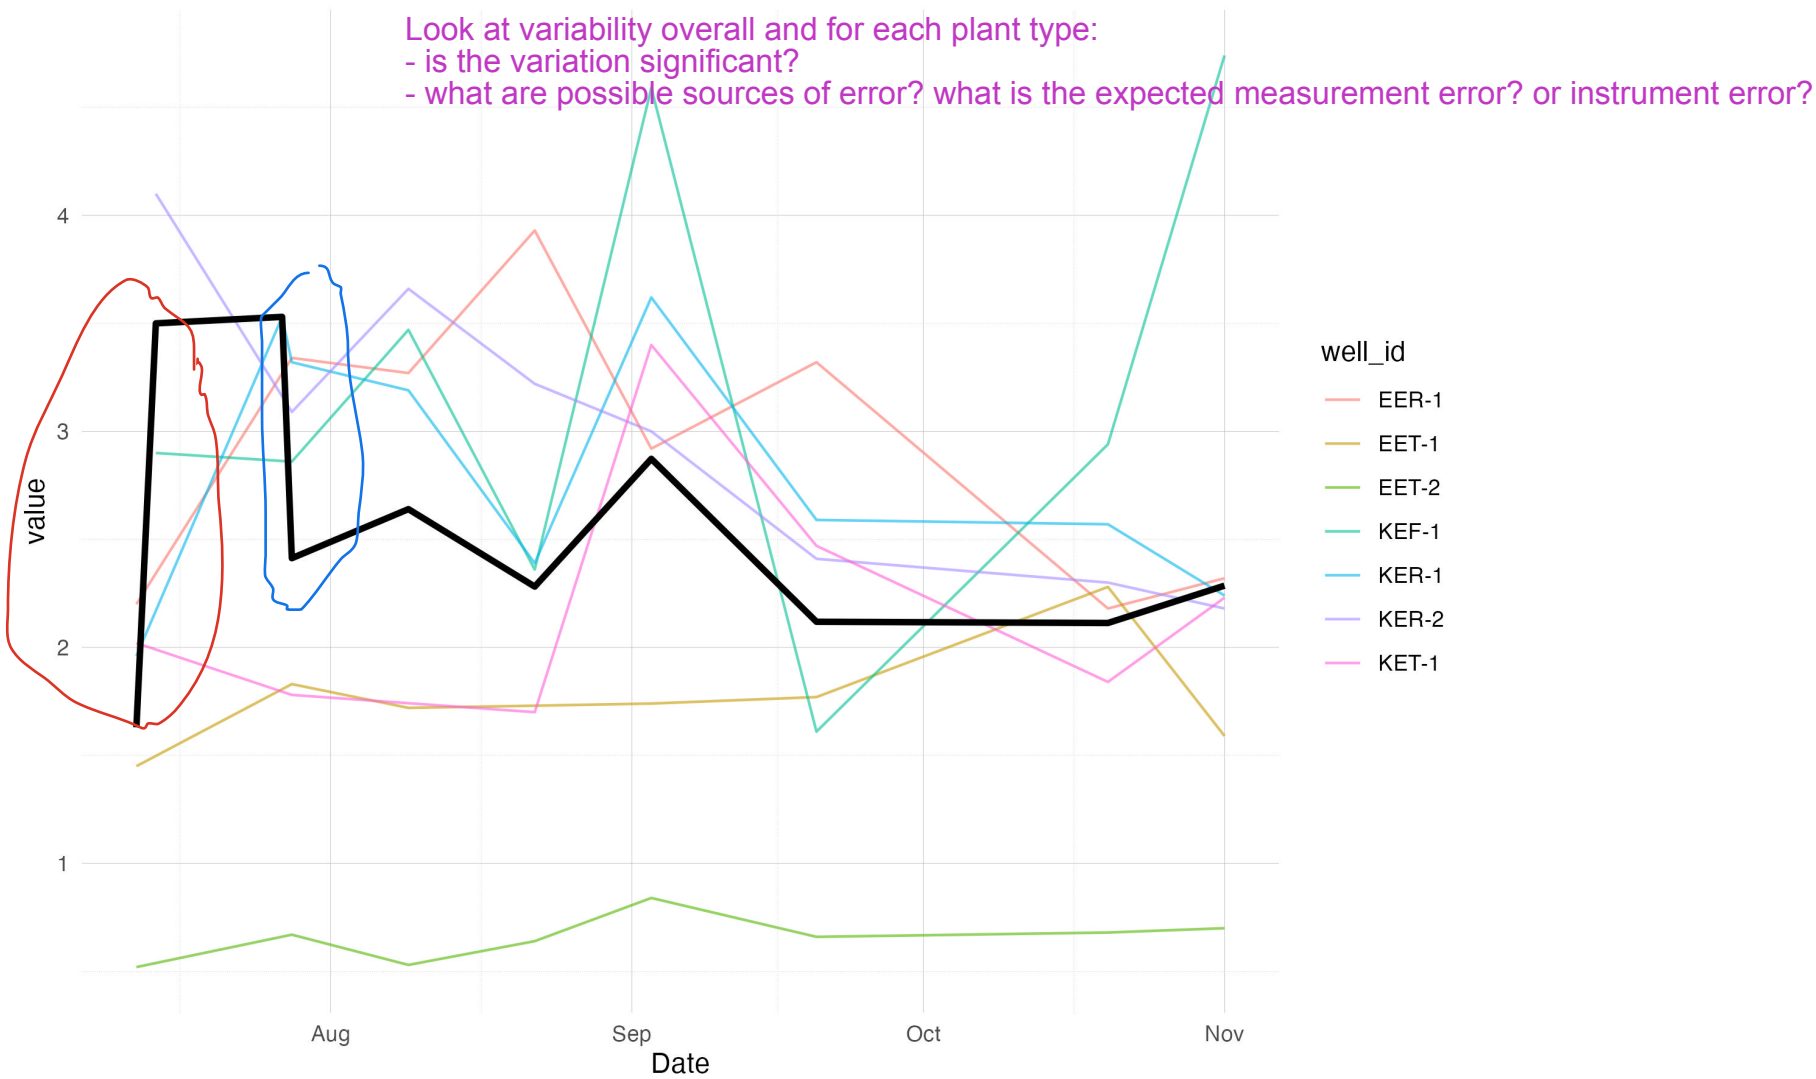

Why the initial jump for Sedge and MH?

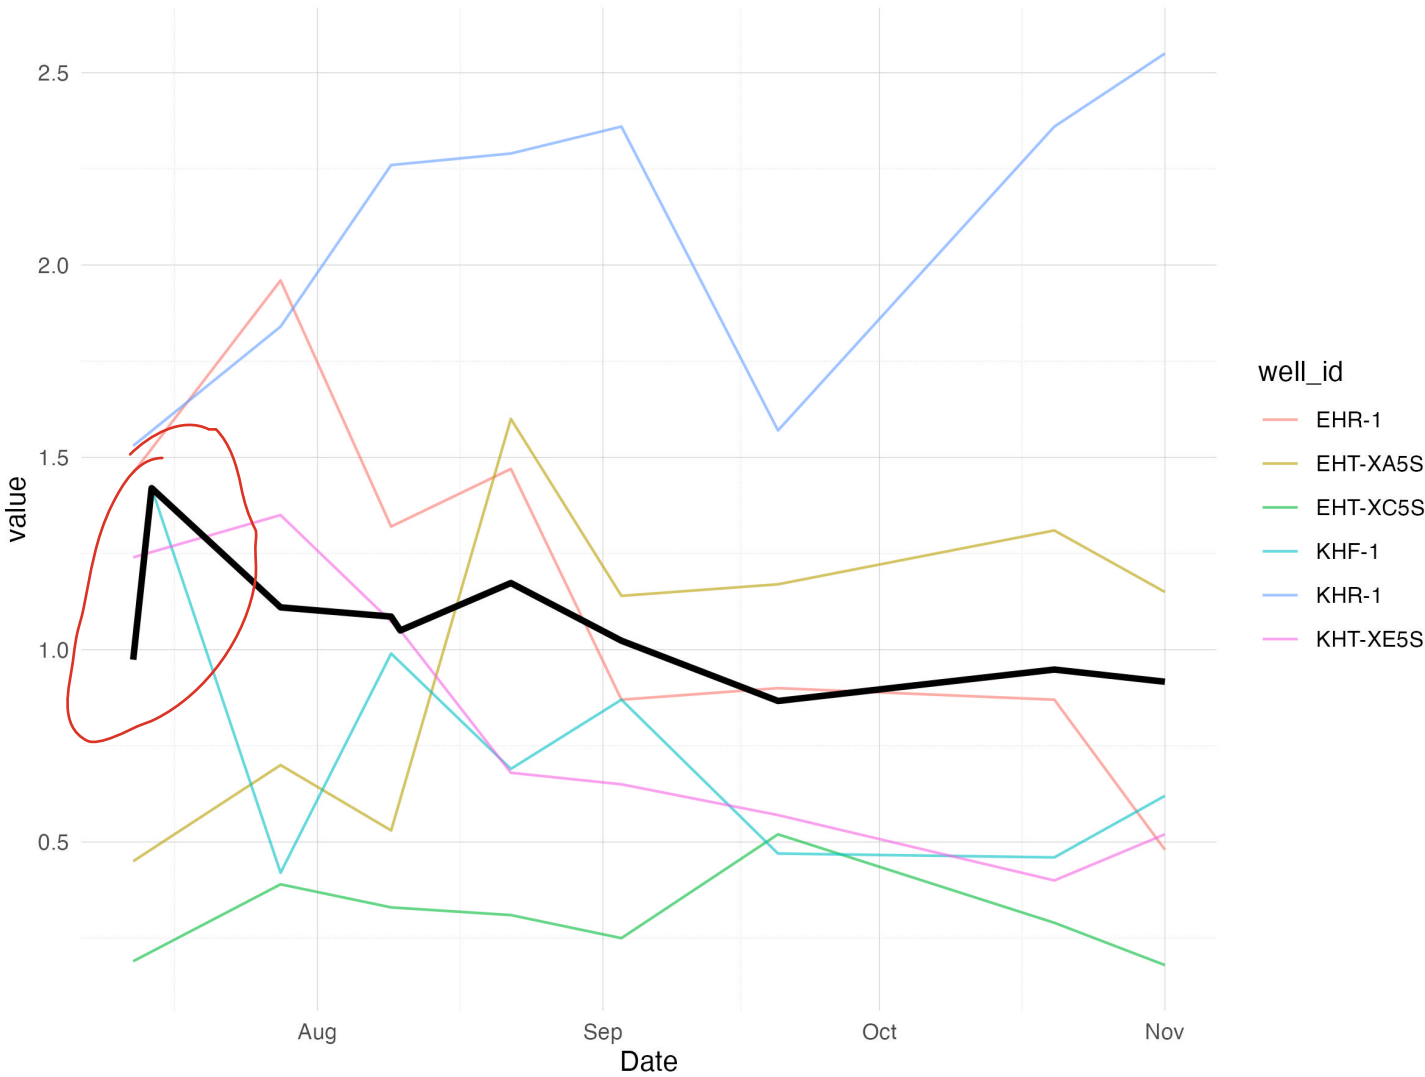

Why the drop in late July/early Aug for Sedge?

A. LAI for Sedge

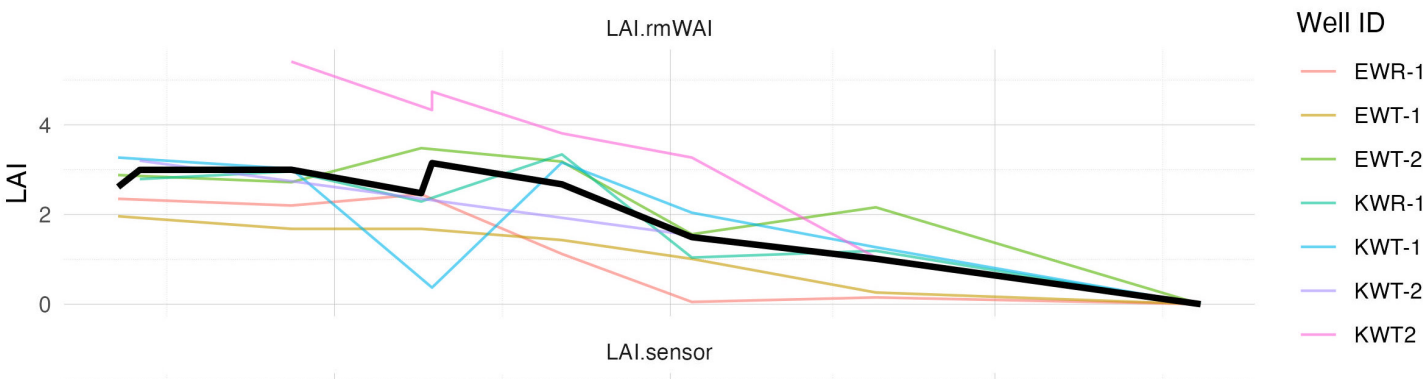

Does a dashed line (for individual wells) or a marker for each measurement help with readability?

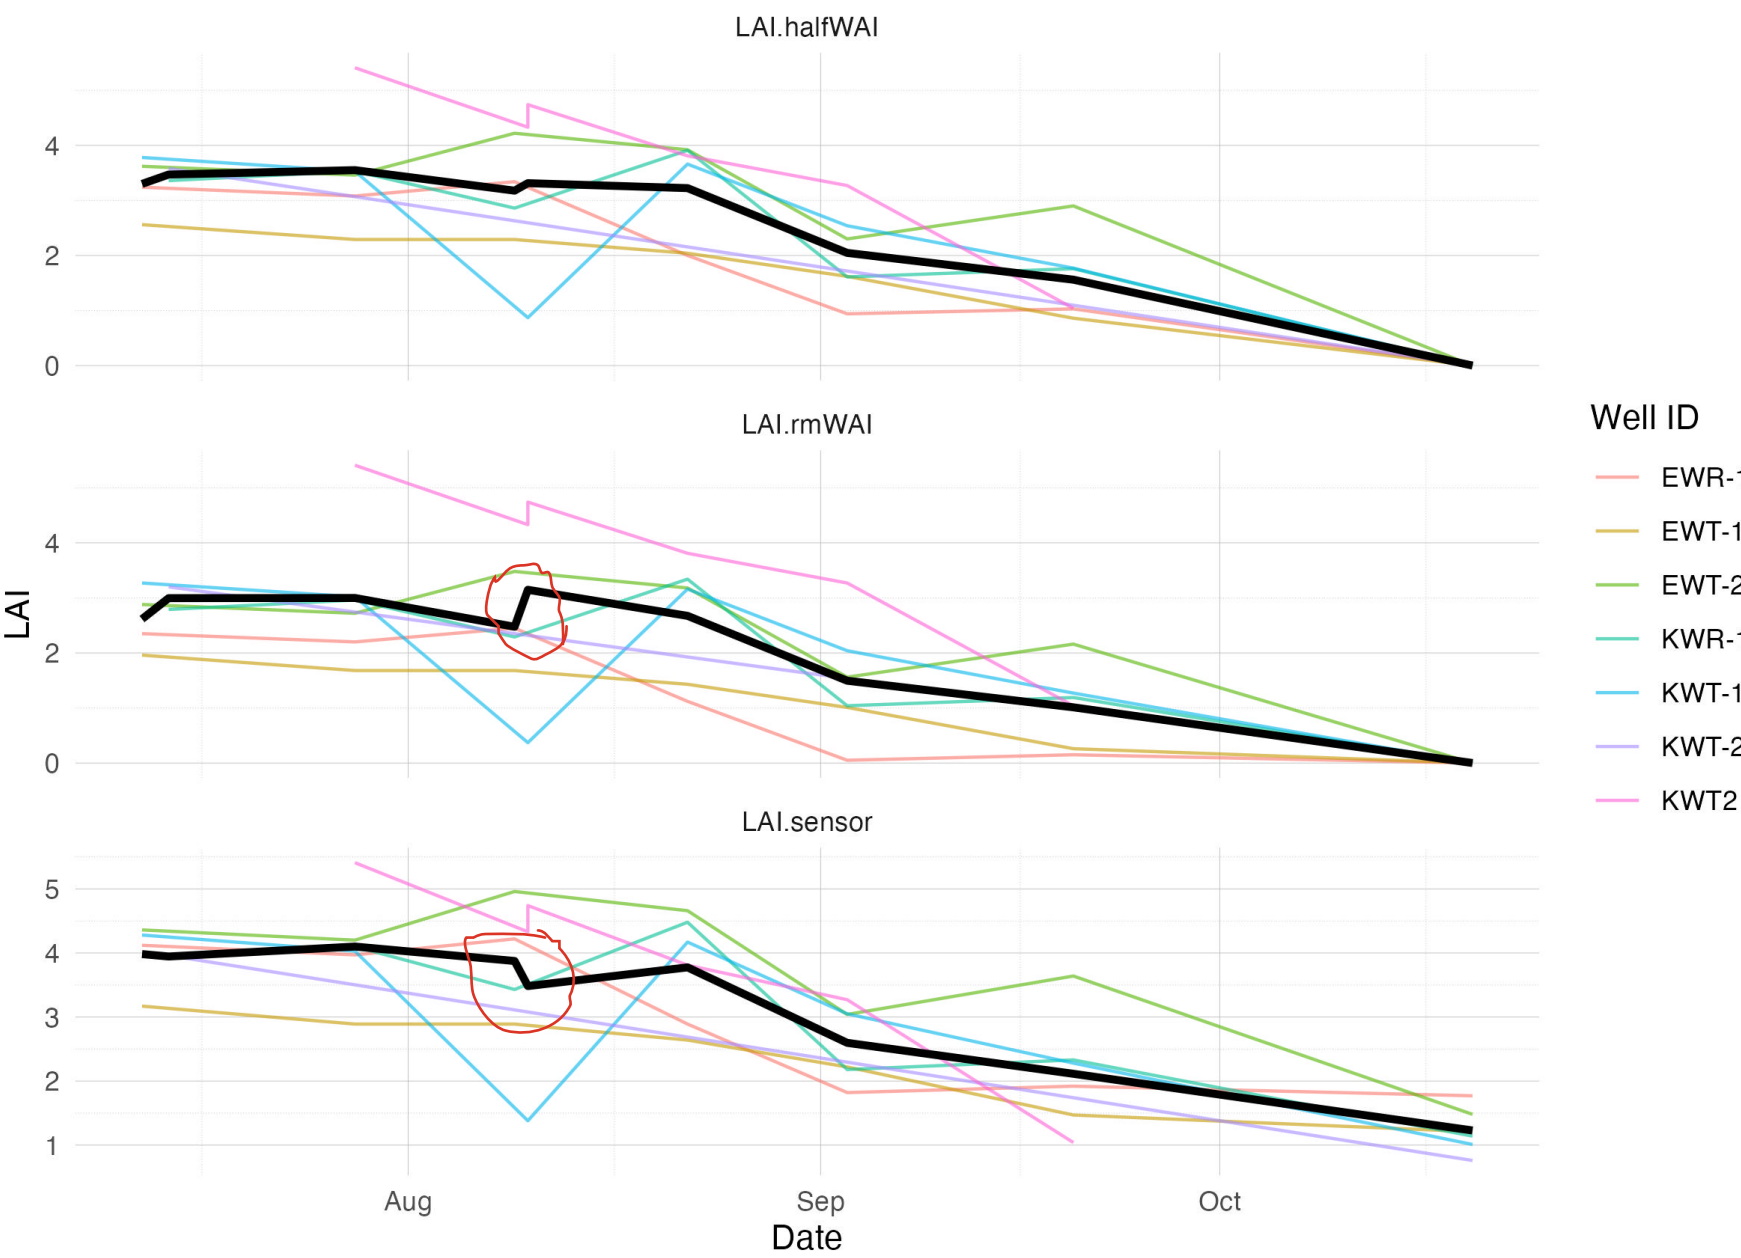

B. LAI for Mixed Herbaceous

C. LAI for Willow

Willow: LAI Correction Comparison

add actual dates on x-axis (ALL)
markers (dot) for when measurements occurred

why down for RAW, why up for rmWAI?
