If we measure soil moisture (esp in a clay layer), how use that data to improve Sy?

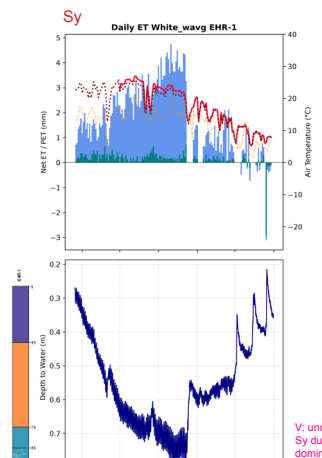

See Nachabe papers to see his methods.

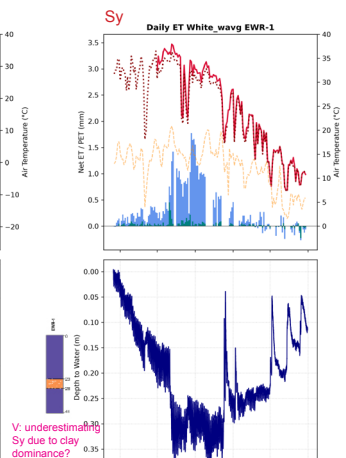

Add Sy used.
Find missing wells! soil data?

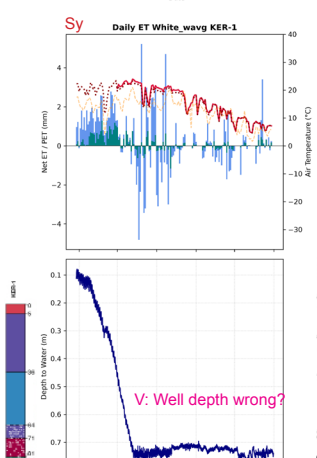

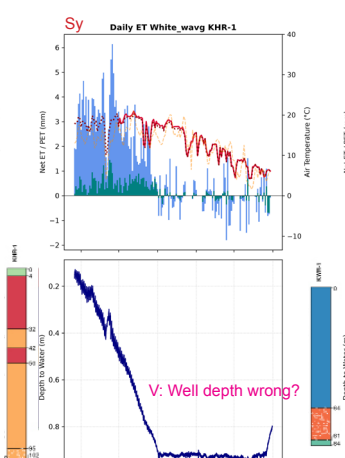

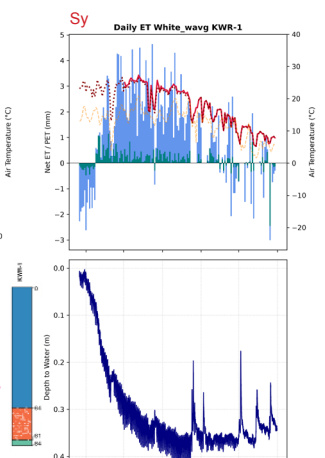

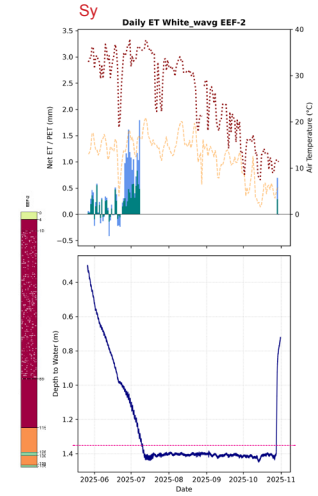

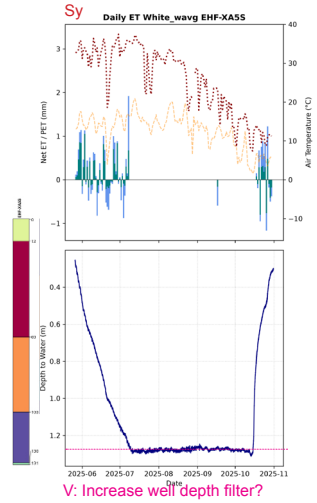

V: underestimating Sy due to clay dominance? maybe the gravel dominating the behavior?

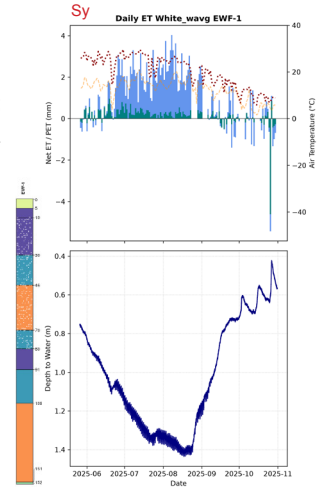

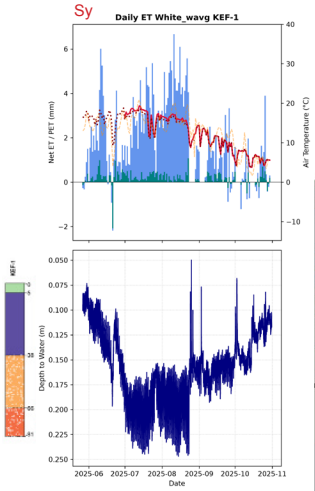

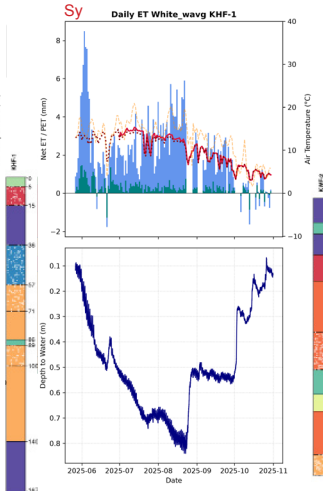

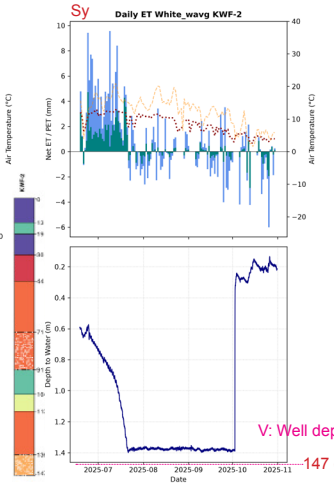

V: Increase well depth filter?

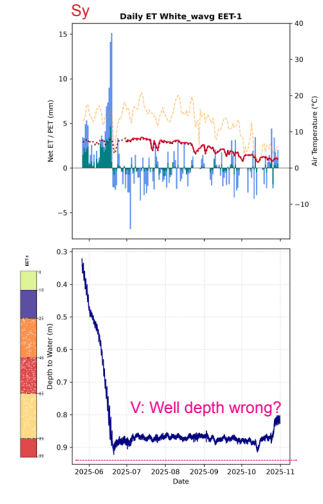

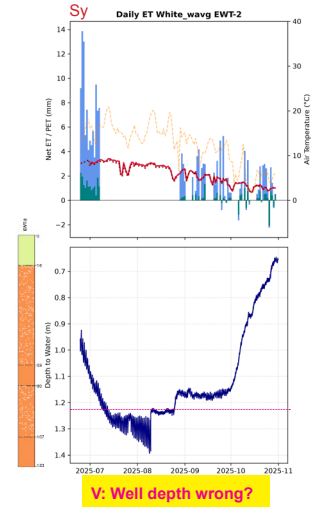

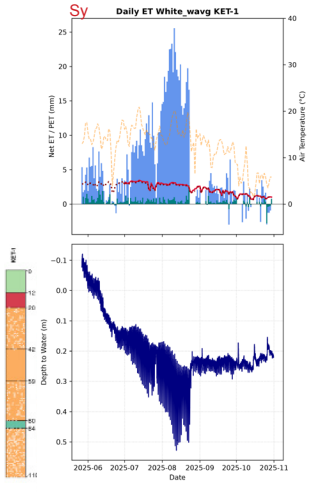

V: Well depth wrong?
147 cm

EHT-XC5S:
- ask Kirchner for gw logger data!
- auger for soil profile

V: Well depth wrong?

KHT-XE5S
- auger to complete soil profile (0-100 cm)
- use E6S for temp data

KWT-2?
- wrong soil profile name?
